CSC380 Project Requirements

Phase 1: Report Content

The report for Phase 1 must include the following components:

1. **Cover Page**
   - Project title.
   - Names of the students.
   - Student IDs.
   - Course code and name.
2. **Project Subject**
   - Students must choose a project subject. Suggested subjects are available in the Google Sheet.
3. **Project Description**
   - Provide a detailed description of the proposed project in English.
   - Explain the relationships between entities and any constraints.
   - Include at least one of each type of relationship:
     - One-to-one.
     - One-to-many.
     - Many-to-many.
4. **Entity-Relationship (ER) Diagram**
   - Create a clear and accurate ER diagram that aligns with the project description.
   - Use appropriate drawing tools (e.g., Visio, Draw.io).
5. **Relational Schema**
   - Map the ER diagram into a relational schema.
   - Highlight primary keys (PK) and ensure foreign keys (FK) reference their respective PKs.
   - Specify constraints, such as unique, not null, and others.
6. **SQL Schema**
   - Use MySQL Workbench to create the ER diagram and employ the Forward Engineering process to generate the SQL schema.
   - Include the generated SQL script (CREATE TABLE statements) along with all constraints in the report.
7. **Technical Environment**
   - Describe the technical environment planned for the project:
     - DBMS product (name): MySql, PostgreSQL, etc.
     - Programming environment (e.g., operating system, IDE).
8. **Submission Format**
   - Submit Phase **ONE** as a single PDF document containing all required components.
   - The file name should match the project title.

Deadline:

- Submission due:31/10/2026.

Nb.:

1- Do not use tables employee, department in your projects.
2- Use 1-1 relationship related to your subject do not fabricate synthetic/artificial one.
